

StarNavi: Test task

To successful passing of our test you should handle with following criteria:

- the app MUST work without errors
- presets for app mode you can fetch using this endpoint <https://60816d9073292b0017cdd833.mockapi.io/modes>. This is should be request to the server NOT just copy paste of data.
 - This data is array of objects with field:
 - **field** - contain size of app field. Should be square form

Work description:

- user set app mode
- press **START**
- if the user hovers on the square - it turns blue
- if the user hovers on the blue square - it turns white
- show hover squares

Requirements:

- Use React / Vue / Angular 2+
- The result of the work should be a link to the repository

Example of design:

Pick mode

START

Hover squares

row 2 col 1

row 2 col 2

row 2 col 3

row 3 col 3
